Marking a Waypoint

To mark your current location:

- Press and hold ENTER/MARK until the Review Waypoint Page appears, and then release it. The GPSMAP 292/298 captures its current location and creates a default name and symbol for the new waypoint.
- To accept the waypoint with the default information, press ENTER, or to change any waypoint information, highlight the appropriate field and press ENTER.

Review Waypoint Page

To create a new waypoint from a map feature:

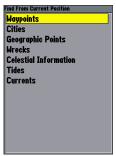

- 1. Use the **ROCKER** to move the pointer and highlight the map feature you want.
- 2. Press **ENTER/MARK** to capture the pointer location. The Review Page for the selected map feature appears.
- 3. To accept the waypoint with the default information, press **ENTER**.

To find an item from your current location:

- 1. From any page, press **FIND** to open the Find From Current Position Page.
- 2. Highlight a category, and press **ENTER**. For some categories, you might need to select multiple subcategories.

Finding an Item

3. Highlight an item in the search results list, and press **ENTER**. The Review Page appears showing item information, map location, chart name, distance/bearing, and options for creating a waypoint or viewing the next item in the search results list.
