Using the Find Feature:

- 1. Tap the **Find** icon on the Map Page tool bar to display the Find Menu.
- 2. Then select a category icon and tap it to open the search list. To narrow the list of items, tap the second field to display the list of search options. Choose "Near Current Location".
- 3. To shorten the list even more, tap the category field to display a list of sub-categories to refine the type of map item you are searching for.
- 3. To further shorten the search, enter a key word in the name of the item you are searching for in the "Name" or "Containing" field.
- 4. Select the desired destination and tap to highlight it. Then tap the Routes icon at bottom of the page to begin route calculation. From the pop-up options window, select the calculation preference and then tap **OK** to complete route calculation.
- 5. When complete the route will be displayed on the Map Page along with navigation instructions and voice prompts.

Navigating a Route on the Map

Managing a Route

Once you have selected a destination and calculated a route, you can modify the route, preview turns, and save it for later reuse.

- 1. Tap the **Routes** icon on the Map Page tool bar to display the Routes Page. Then tap the desired **Routes Option** icon.
- 2. Tap the **Turns Page** to view a list of turns for the route. Tap a turn entry to preview the turn on the map.
- 3. Tap **Recalculate** if you have left the route and want to calculate from your current location.
- 4. Tap the **Detour** icon if you want to detour the route around a traffic jam or road construction.
- 5. Tap the **Stop Navigation** icon if you want to guit the route.
- 6. Tap the **Route Preferences** icon if you want to change the way a route is managed in order to meet your personal requirements.

Start-Up and Satellite Acquisition

(For faster acquisition, set the Pocket PC's clock before starting the Que Application

- 1. Turn On the application by tapping the Garmin Que icon from the Program Page or the Start Menu.
- 2. Observe the Map Page and the GPS status messages as they appear at the top of the page.
- "No GPS Connected" you have not installed the cf Que fully into the CompactFlash card slot.
- contact with the cf Que module.
- satellites to establish its location
- "3D GPS Location" enough satellites are fixed to determine an elevation as well as ground location.

If the cf Que can't get past the "Acquiring Satellites" position. If you get an intermittent "Lost Satellite Signal" message, move away from objects blocking the signal.

location by searching for satellites over your current locafor satellites that are overhead

direction of travel or the next street intersection ahead.

- "Waiting for GPS" the Que application is making
- "Acquiring Satellites" the cf Que is search for satellites. • "2D GPS Location" - the cf Que has a fix on enough
- message, move to a location where you have a clear view of the sky. Adjust the cf Que antenna to more of a horizontal
- If you're starting up for the first time or you have moved over 600 miles since last use, it must initialize (determine its tion). Use the Location option from the GPS Info Page Menu to mark your approximate location so it knows to look only
- Once you begin to move, the message field displays your

Navigation using the Map Page

Navigation is the process of going from your current location to another, and the Map Page has features to help you do that.

Data Fields - Provide GPS Status when not moving, Direction of Travel or Next Street Ahead, Compass Direction, Speed and Current Location

Map Detail - With downloaded detailed maps: Residential Streets, Rivers, Lakes, Points of Interest and Individual Addresses. Oriented with North Up unless in Track Up mode.

The Position Arrow - Indicates your current location. Tap to center it on the map page. Points in the direction of travel.

The Map Pointer - Marks map locations using the stylus. Displays information for a location if available.

The Map Scale - Tapping the Map Scale Box in the lower left corner of the map displays the moving Map Scale. Tap the arrows to move up or down the scale. Tap the desired scale to close.

The Map Page and its features:

Data Fields for Direction and Status. Speed and Current Location

The Tool Bar - Quick ways to get things done. Tap the icon to get the result shown below.

Navigating to a Destination

A destination can be determined in two ways: you use the Map Pointer to mark a point on the map and then tap the Routes icon... or use the Find Feature to search for a destination from the map database and then, when found and highlighted, choose the "Route To It" option from the Find Options Menu.

Using the Map Pointer:

- 1. Tap the point on the Map Page that you want to navigate to. If there is information about that point in the map database, it will display next to the point.
- 2. Then tap the **Routes** icon to display the Routes Page.
- 3. Tap the "Route To" field and the route will begin to calculate.
- 4. A pop-up window will offer three preferences for calculating the route. Select an option and tap **OK** to return to the Map Page to complete calculation.
- 5. When the calculation is complete, the route will display as a purple overlay on top of the map.
- 6. The first maneuver on your route is displayed at the top of the map page and is complemented by a voice prompt.
- 7. To view all of the turns on the route, open the Routes Page and tap the Turns Page icon. A list of the turns will display and a tapped.

The Trip Computer

preview page for each turn will display when the turn on the list is
