Speed Assistant shows you the maximum permitted speed and gives you an audiovisual warning if you exceed it

Last Mile saves the parking location and automatically continues in pedestrian mode

Google Street View real view of your destination when entered and before you arrive

... more information at navigon.com and from the Marketplace

Active Lane Assistant

shows you a realistic display of the actual route ahead in the form of a dynamic live animation. This means that you always know which lane you need to take next.

Reality View Pro

Getting in lane made easy: with Reality View Pro, you'll be informed in good time about motorway junctions and when you need to change lanes. Thanks to photo-realistic displays of exits, you will keep an overview at all times.

FreshMaps XL*

A one-off payment ensures that you receive up-to-date maps every three months, for at least two years. This will keep you right up to date – and alongside changes to the road network, you will also find out about a whole host of new special destinations. Includes an update of regional maps on Europe 44.

Urban Guidance*

enables public transport to be integrated with the navigation system. Whether you are travelling by bus, underground, tram or water taxi – Urban Guidance, combined with pedestrian navigation, always takes you on the shortest and most reliable route to your destination.

Last Mile

saves your location after parking and automatically guides you onwards to your destination in pedestrian mode – and, if you like, back again just as easily.

Panorama View 3D*

shows you the landscape in the display, not as a flat surface, but in 3D with mountains and valleys. Thanks to this, you'll be able to orientate yourself better in unfamiliar surroundings.

Cockpit*

accesses all available sensor values from your smartphone and, combined with GPS, provides you with comprehensive statistics and information about your driving style.

Traffic Live*

regularly provides the latest traffic information in real time, thus helping you to avoid traffic jams and to save time and costs.
