Oracle Developer

We are a leading worldwide provider of navigation devices and wearable technology, with a focus on developing, designing and supporting superior products.

As an engineering and technology company, we have a keen focus on recruiting talent in the fields that support Garmin business and products.

Our benefits are designed to lead an evolving marketplace, support innovation and encourage a healthy balance between work and life. They allow our associates to make their own decisions about their wellbeing and future and consistently rank Garmin as a top tier benefits provider when compared to other high-tech employers.

Summary of the role:

Your role would be *to develop, customize, and enhance the applications that support Garmin business requirements.*

In this role, you will be responsible to:

- Work closely with the ERP Applications Analyst to develop, customize, enhance and support ERP application software in Oracle E-Business Suite
- Create enterprise software using Java, PL/SQL, SQL to support and integrate with Oracle R12 E-Business Suite

We are looking for a person with the following **skills and knowledge**:

- Proficiency in writing software in developmental languages (Java, SQL, PL/SQL)
- Proficiency and previous experience in designing, enhancing and developing single and multi-system applications
- Ability to learn and understand secure coding practices
- Experience with version control system such as GIT
- Experience with automated testing tools and testing procedures
- Strong and effective verbal, written, and interpersonal communication skills.

Desirable **qualifications and background** include:

- BSc in Computer Science, IT or similar
- 2+ years of relevant work experience

Would be **nice to have**:

- Experience with ERP systems, preferably Oracle 11i or R12 applications
