

Product Designer

Garmin Italy Technologies is now boarding a Product Designer!

You are self-motivated, goal-oriented, and a strong team player willing to actively contribute to the success of the team by providing UX/UI solutions and support in a dynamic, high-performance environment.

We offer you the chance to join a team of professionals who all work together to achieve the best results for our customers. You will work with people with a pioneering spirit and passion for challenges.

What you'll do:

- Design UX/UI solutions for mobile (iOS/Android) and web features for Garmin marine products.
- Provide UX research support, high-level prototypes, screens and user interface assets to development teams.
- Apply design best practices and Garmin standards and procedures.
- Identify and resolve usability issues through proper design tools and techniques.
- Communicate and discuss design principles, rationales and solutions to stakeholders and to multidisciplinary development teams.
- Plan and estimate UX/UI work activities and effort.
- Test UX/UI solutions and provide documentation and specifications of the work done.
- Work with a sense of urgency, commitment and focus on the right priorities.

What you'll need:

- Bachelor's degree or equivalent combination of education and relevant experience.
- Outstanding academic qualifications with the ability to effectively apply learned knowledge.
- Good communication skills and be capable of documenting work in an organized manner.
- Be able to work professionally and in a positive respectful manner with all other Garmin associates.
- Ability to work in a collaborative team environment to achieve goals and to accept and act on constructive criticism.
- Ability to share information and ideas freely and positively.
- Some experience designing screens and user interfaces.
- Desire to learn prototyping testing.
- Knowledge of UX/UI design, design thinking, usability principles and processes.
- Knowledge of and some experience documenting and specifying UX/UI solutions.
- Fluency in English.

Bonus points if you have:

- Experience with UX/UI tools such as Figma, Sketch, Photoshop.
- Experience with mobile and web software development.
- Knowledge and passion for on-the-water activities.

Our home: you can find us in via Fondacci 269 in Massarosa (LU), Italy.

Workplace type: hybrid

How to apply:

or

Send your application to jobs.mas@garmin.com to apply for this job opportunity and for any future job opportunities coming up in the next 24 months: for this purpose, we will retain your personal data for up to 24 months to assess your suitability.

Company:

Garmin® Italy Technologies produces electronic charts for the leisure boating market. Our mission is to delight our customer by producing market leading intuitive and innovative marine cartography content and features through the use of creativity, engineering excellence through market knowledge and efficient production procedures.

Our cartography is available to boaters for use in GPS chartplotters, and within our app for Apple® and Android™ devices.

It's not about the things we make. It's about the things we make possible.

Our office is based in Massarosa, Tuscany, the perfect starting point for reaching nearby cities of art, beaches and mountains.

With over 20,000 associates in 34 countries around the world, the Garmin® group brings GPS navigation and wearable technology to the automotive, aviation, marine, outdoor and fitness markets.

At Garmin®, we like to work hard and play hard. It comes easy when you work on cool products with hard-working individuals who share the same passion.

We think every day is an opportunity to innovate and a chance to beat yesterday.
