

# Software Quality Specialist (Manual)

## Automotive

We are a leading worldwide provider of navigation devices and wearable technology, with a focus on developing, designing and supporting superior products.

As an engineering and technology company, we have a keen focus on recruiting talent in the fields that support Garmin business and products.

Our benefits are designed to lead an evolving marketplace, support innovation and encourage a healthy balance between work and life. They allow our associates to make their own decisions about their wellbeing and future and consistently rank Garmin as a top tier benefits provider when compared to other high-tech employers.

If cars are your thing, Garmin has your team. The worldwide leader in satellite navigation is making inroads in the automotive OEM (original equipment manufacturer) team. We're seeking a talented Software Quality Specialist to create and execute test suites on Garmin products, ensuring adherence to defined software verification and testing processes. Must be able to capture, document and suggest refinements to system and software requirements.

In this role you will be responsible for collaborating and adding value through testing and by providing comments and suggestions and communicating shared test ideas across team

If you're up to the test, send us your resume. We are looking for a full-time Software Quality Specialist at our location in Cluj Napoca.
