

# Senior Automation Software Quality Engineer

*We are a leading worldwide provider of navigation devices and wearable technology, with a focus on developing, designing and supporting superior products.*

*As an engineering and technology company, we have a keen focus on recruiting talent in the fields that support Garmin business and products.*

*Our benefits are designed to lead an evolving marketplace, support innovation and encourage a healthy balance between work and life. They allow our associates to make their own decisions about their wellbeing and future and consistently rank Garmin as a top tier benefits provider when compared to other high-tech employers.*

## **Summary of the role:**

Your role will be to implement Automation solutions based on project needs and building upon what is available to help improve project efforts

## **In this role, you will be responsible of:**

- Develop test strategies and POCs for new projects
- Documenting, troubleshooting and isolating problems encountered during testing
- Train team mates on new tools and systems
- Mentor junior team members and hold automation training within the department
- Collaborate daily on a distributed, cross functional agile team

## **We are looking for a person with the following skills and knowledge:**

- Ability to quickly adapt and understand product technologies;
- Ability to coach and mentor other team members;
- Experience working with multiple testing frameworks and tools (Selenium/Serenity, Applitools, Cucumber, HP UFT);
- Working with Jenkins, Bamboo or comparable continuous integration systems;
- Experience with API testing,
- Experience with setting up and installing VMs;
- Familiarity with database systems (preferably Oracle);
- Working with Version Control Software (preferably GIT)
- Must demonstrate experience in writing automated tests using Selenium and Java
- Experience with Agile work methodology
- Strong and effective verbal, written, and interpersonal communication skills
- Good English skills

## **Desirable qualifications and background include:**

- BSc in Computer Science, IT or similar
- Mid - Senior QA Automation Engineer, 5+ years experience , preferably in working with web applications

## **Would be a plus:**

- Proven contribution to the testing / opensource community (meetup groups, blogging, StackOverflow, QA/Automation forums);
- Previous experience with Mobile Test Automation Frameworks and techniques.
