

GARMIN ACADEMY

JAVA MODULE – SPRING 2019

Garmin Academy - Java module is a series of workshops, that will be organized for **6 weeks** (March 4th – April 12th), **twice a week** (Tuesday and Thursday), for about **2 hours** (between 16.00 and 18.00). Each workshop will have at least 2 mentors. These mentors will prepare the material and create attractive, interesting presentations. We will be able to track the progress of students, by giving them homework and by interacting with them.

If you want to learn from our Java developers how it's done, send us a CV at **Garmin.Academy@garmin.com**, until January 18th. All you need is another experience with Java (an internship or maybe a project) and Java Core knowledge - beginner level.

What do you think? Ready to **learn together and grow together** with us?

Other people who graduated a Garmin module said:

“Being part of the Garmin Academy, this year, was a great opportunity for me to meet three very experienced, enthusiastic people who were always happy to share their knowledge with us. This experience has shown me what "working professionally" means. I had a lot of new things to learn and the atmosphere was nothing but friendly. I really appreciated the practical part of this project and the amount of interest that our mentors manifested in giving constant feedback. The nostalgic feeling I had when all of this was over was replaced with new challenges, a few months later, when I became part of in a new great team, the Aviation team.”

“To me, Garmin Academy had been one of the most beautiful and interesting experiences offered by a company. Each mentor presented and taught us a small part of his department or the technology he worked with. Everyone was passionate about the products and their tasks and inspired us all. Being a second-year student and looking for internships, this program was an important step in my decision to join Garmin. Two and a half years later, I'm still part of the Garmin family 😊 I would recommend this program to anyone who is looking for a different, more practical, experience or to those who want to learn and discover the company through the people who are part of it. “ – *Bianca*
